

OMEGA 7.2

ELECTRIC. SMART. CONNECTED.

Powerful, yet quiet - Omega 7.2 blends performance and smart technology for your days out at sea.

Spacious and configurable to your desired level of comfort - Omega is the epitome of our vision for a clean and connected experience out in the water.

Powered by our marine grade *Helios Battery Systems*, a solar rooftop and connected by Helios Marine Link - the Omega embodies the standard we want to set for safe, digital and green mobility.

SUN-POWERED. SEA DRIVEN

Powered by Helios Batteries

Choose the battery that matches your adventures

Omega is available with three Helios battery packs, so you can tailor range and performance to your style of sailing:

- 18 kWh – ideal for day trips and short coastal hops
- 36 kWh – the sweet spot for weekend escapes
- 54 kWh – maximum range for longer journeys and more autonomy

Typical charging times (0–100%)

- 18kWh: ~6 h at 3 kW · ~2 h at 9 kW
- 36kWh: ~12 h at 3 kW · ~4 h at 9 kW
- 54kWh: ~18 h at 3 kW · ~6 h at 9 kW

Real-world charging times may vary with temperature, state of charge and local grid conditions.

Complete control, wherever you are.

With our on- and off-board control module, Helios Marine Link, you remain in full command of your Omega:

- Live system monitoring
- Geofencing
- Voice commands
- Remote diagnostics and predictive alerts
- MFD marine system integration
- NMEA certified & compatible

The Future of Boating is Connected

1. Intuitive User Interface available as an app on iOS, Android or other MFDs
2. 5G connectivity & Secure Data Transfer
3. Remote Camera Monitoring
4. Acts as your Omega's *brain* - connects with all peripheral devices & continuously optimizes performance.

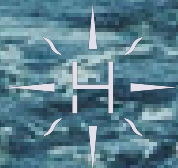

Helios Marine Link's intuitive UI helps you navigate through any marine conditions.

Omega is designed to bring you complete peace of mind. Autopilot mode is one of its features helping you get there.

Whether you want to take a break, or get active, you can let our smart technology guide you in the water.

Set your desired speed. And let Omega do the work*.

Powered by the Sun

1.55kW of solar power allowing for range extension of 10-15% at lower speeds.

Summer Mediterranean yield of 5-7kWh per day.

Specifications

- * 100% electric
- * 25kW or 50kW motor configuration
- * 90nm range at cruising speed
- * Solar hardtop
- * IP67 marine grade LFP batteries
- * Helios Marine Link installed

- Length: 7.2
- Beam: 2.4m
- Draft: 0.5m
- Light displacement: 1.2t
- Fresh water capacity: 30l
- Vmax: 17 knots
- Vcruise: 6 knots
- Range: up to 315nm with solar*
- Passengers: 8
- Certification: C

Clean design & UV resistant marine fabric
Exotic wood table with 4 cup holders

Large sunbed to enjoy the view

Retractable stern swim platform

COMFORT & DECK

Retractable cleats

2 built in Bluetooth speakers

Stainless steel automatic anchor*

EQUIPMENT
